Tooling technology

Metal machining

AT BENZ GMBH WERKZEUGSYSTEME, OUR MAXIM “INNOVATION, PRECISION, PASSION“ IS FAR MORE THAN JUST A MARKETING FORMULA. RATHER, IT DESCRIBES THE CORE GOALS OF OUR BUSINESS WHILE ALSO OUTLINING THE REASONS WHY WE HAVE BEEN ABLE TO COMPETE IN THE MARKET SUCCESSFULLY WITH TOOL SYSTEMS FOR WOODWORKING, METAL MACHINING AND COMPOSITE MATERIAL PROCESSING FOR MORE THAN 30 YEARS.

INNOVATIONS ARE IMPORTANT TO US. BUT WE ALSO RECOGNIZE THAT THEY CAN BE SUCCESSFUL ONLY IF THEY PRECISELY MEET THE NEEDS OF OUR CUSTOMERS. THIS IS WHY WE HAVE MAINTAINED A STRICT FOCUS ON OUR CUSTOMERS FOR MANY YEARS. WE ENSURE THAT OUR DEVELOPMENTS AND INNOVATIONS SIMPLIFY YOUR PRODUCTION PROCESSES AND LOWER YOUR MANUFACTURING COSTS AND ULTIMATELY IMPROVE YOUR COMPETITIVENESS AS A RESULT.

BENZ GMBH

WERKZEUGSYSTEME

BENZ PRECISION PRODUCTS PROVIDE REFINED SOLUTIONS, INNOVATIVE TECHNOLOGY AND THE HIGHEST LEVEL OF QUALITY. WHAT IS THE SECRET TO THIS SUCCESS? OUR EMPLOYEES AND THEIR INVALUABLE EXPERTISE MAKE THE DIFFERENCE.

Innovation. With an eye on what is currently within the bounds of feasibility, we strive to always make use of innovative technologies. And we keep in close contact with our customers to ensure we already know today what our customers will need tomorrow. Technical progress is ingrained into our very identity, which means you can always find smart, detailed solutions in our product range.

Precision. We ensure our products have the highest level of precision and reliability. This is vital in our industry. Our customers also rely on absolute precision during production—and need to be able to put all their trust in us. But production is not the only area where we strive for precision. We also seek minimal tolerances and maximum accuracy in other areas as well—from development to sales to delivery.

Passion. BENZ precision products are composed of a vast array of different individual parts. They are the result of great care that starts in the design phase and even includes the selection of raw materials. Primarily, however, they are the expression of our employee's experience and passion to do good work. We are tool specialists through and through and we are willing to move mountains to reach the perfect solution and to ensure the satisfaction of our customers.

PRODUCT GROUPS

TOOLING AND MACHINE TOOLING TECHNOLOGY

TOOLING TECHNOLOGY

LIVE TOOLS/ TOOL HOLDERS

- + Radial heads 90°
- + Radial heads ≠ 90°
- + Axial heads
- + Swivel heads
- + Multi-spindle heads
- + Broaching units
- + Rotating tool holders
- + Static tool holders

Components. Our comprehensive tool concepts for turning centers and milling centers are ideal for nearly every application. Providing a technological advantage is our goal.

Specific to the customer. Our modular approach enables customized configurations.

Systems. We develop special customer-specific tools for OEM and end customers on request.

EXCHANGEABLE UNITS

- + Angle heads 90°
- + Angle heads ≠ 90°
- + Swivel heads
- + Multi-spindle heads
- + Broaching units
- + High-speed spindles

Knowledge and experience. Our knowledge of the metalworking industry and decades of development partnership make us ideal for new tasks anywhere in the world.

Components. We deliver a vast array of standard components from stock and develop innovative, customized systems for OEM and end customers.

Variety. Whether in machining centers in the automotive, aerospace or wind energy industries, units from Benz can be used anywhere. Numerous customers choose us as their systems and innovation partner.

EXCHANGEABLE UNITS

- + Angle heads 90°
- + Swivel heads
- + Multi-spindle heads
- + Multi-axis heads
- + Sanding units
- + Floating head units

For any application. Cost-effectively process and machine wood, composites and aluminium: We provide series production angle heads for drilling, milling, sawing and grinding in addition to other units for special applications.

From basic to high-end. Benz units are available in a variety of performance classes, making them ideal for everything from light machining to high-performance continuous operation.

Systems. We have the solution for your special applications: Customized Benz units for machining centers. Put us to the test!

METAL

WOOD/COMPOSITE MATERIALS

MACHINE TOOLING TECHNOLOGY

MULTI-SPINDLE HEADS AND LARGE DRILL HEADS

- + Large angle heads
- + Large drill heads
- + XXL multi-spindle heads

Development partner. We accompany you from brainstorming to inspection of the final machine, always to your expectations. Our assortment ranges from compact heads to XXL units.

Systems. Benz stands for high-end solutions in the fields of machine tooling technology, specialty solutions, custom assemblies and mechanical modules. We manufacture and configure multi-spindle and large-angle heads as well as large drill heads.

Components. Attachment units complete our range.

SYSTEM TECHNOLOGY

- + Multiple-spindle drill heads
- + Motor spindles
- + Motors
- + 5-axis technology
- + C-axes
- + Swivel axes
- + Rotary distributors
- + Z-axes

Components. Our range includes standard products in an assortment of shapes and sizes.

The perfect addition. Our system additions provide you with even more efficiency. Perfect your existing solutions with Benz products!

Systems. We develop the technology of tomorrow. Your individual requirements for the efficiency of your machine tools and the suitability of the tools in use provide our benchmark for new, innovative solutions.

SERVICE

- + Repair service
- + ExpressService
- + Customized crash package
- + Preventive maintenance
- + Spare part management
- + Global service
- + Service hotline

Do not lose a second. Speed is the order of the day when unexpected breakdowns occur. Our service center ensures immediate assistance around the world. We ensure your machine has as little downtime as possible.

Service quality. We guarantee top service quality reflecting our expertise as a manufacturer.

Foresight. We go one step further: Preventive maintenance, customized crash packages and our spare part management service ensure you have the best setup to face any emergency. We look to the future to keep you at your peak.

System design / Angle heads

► ECONOMICAL COMPLETE MACHINING FOR ALL SECTORS

Angle heads suitable for your individual application

Do you have an application for which an angle head is worth considering for machining a workpiece? Then you are right to come to BENZ GmbH Werkzeugsysteme. Why?

As a partner working with CNC machining, we have many years of experience in the manufacture of CNC machining units for machining centres. We know what we are talking about. And we implement what we say. This is reflected in the angle heads that feature high performance, machining precision and quality.

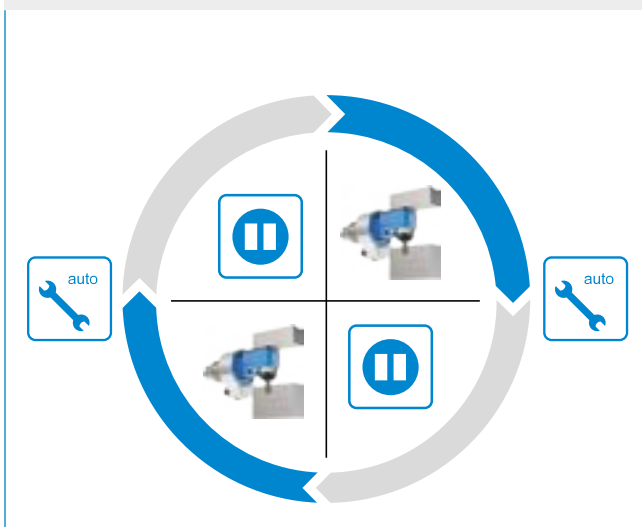

Our objective is to optimize your production sequence. BENZ angle heads assist you in the economic complete machining of your workpieces by minimising the number of tool clampings and machining time and therefore reducing your production costs.

We develop a suitable solution in close cooperation with you as the customer. Together with an extensive standard program, we also offer you individual special solutions. We maintain close contact with machinery manufacturers and therefore have the necessary know-how to develop the exceptional. Challenge us!

BENZ solutions for all sectors

► ADDED VALUE FOR YOUR MACHINE

► Angle head additional module

Angle heads are additional modules that extend the functionality of your tool machine. They are typically used cyclically in the machining process. As a rule unit is at rest after a machining step while the unit is changed and further processing is performed with another tool.

▶ ADVANTAGES OF ANGLE HEADS

▶ **Reduction of machining time / production costs**

BENZ angle heads enable the complete machining of complex workpieces on a machine. Repeated tool clamping is dispensed with. This reduces the machining time and therefore the costs and increases accuracy.

▶ **Efficiency increase / Internal machining**

Even locations on workpieces that are difficult to access or were previously inaccessible can be machined with angle heads.

▶ **Simplification of the machining procedure**

Elaborate and complicated machining procedures can be simplified considerably by using BENZ angle heads.

▶ **Usable in all common machine concepts**

BENZ angle heads are designed for use in all common machining centres with automatic or manual tool change.

▶ **Optimally designed for the machining task**

BENZ angle heads are perfectly matched by our specialists to your individual requirements. We have a suitable solution for every challenge!

▶ **High torque transmission / fewer wear parts**

The transmission of high torques and fewer wear parts are realised by using angular gears made up of a crown wheel and spur wheel.

▶ **Compact, modular design**

BENZ angle heads have an extremely compact design and consist of components including the output spindle (tool holding/clamping system), angle head, torque support and drive cone. Together we prepare the angle head suitable for your work task.

ANGLE HEADS

SYSTEM DESIGN

► SYSTEM DESIGN - GENERAL

① Drive cone / Machine interface

- For holding the angle head in the machine
- All common drive cones available: see p. 11

② Locking disc

- Ensures the exact angle setting of the drive cone for the torque support in combination with the locking sleeve and locking pin

③ Lock

- The lock of the drive cone - together with the locking disc - prevents the drive turning when it is not changed. This enables precise depositing in the tool change magazine. When change the angle head in the machine, the lock is activated by the stop block and the drive is released

④ Torque support

- Secures the angle head against turning during machining by fixing it to the machine spindle
- As a rule it is adapted to the relevant machine type: see p. 11
- Alternative: Standard torque support from BENZ

⑤ Scale ring (360°)

- For manual, stepless turning of the angle head at a desired working angle
- Fixing using clamping screws

⑥ Housing / Angle head body

- Different types and sizes of design available for delivery according to application: see P. 15ff.

⑦ Output spindle (tool holding / clamping system)

- For holding the tool
- All common clamping systems can be realised: see p. 11

Optional: Equipment versions

MULTI-SPINDLE HEADS

TOOL INTERFACES

1

Advantages / Multi-spindle heads

▶ BENZ MODULAR QUICK CHANGE SYSTEMS

BENZ Solidfix®
Output spindle

BENZ CAPTO™
Output spindle

BENZ Nanofix®
Output spindle

- ▶ **Modular design**
via basic tool and exchange unit with various tool holders
- ▶ **Minimize setup- and nonproductive time**
via change of the pre-set tool within seconds
- ▶ **Much lower investment**
as the basic tool stays on the machine and only the adapters are changed in total fewer basic tools are needed
- ▶ **Simple handling**
by one-hand operation, without special tools
- ▶ **Operator safety**
tool cannot fall out

▶ REDUCE SETUP TIME = SAVE COSTS

Long machine standstill times arise for a tool change where the complete unit is taken out of the machine. By changing the cutting tool directly on the unit, setup times can already be reduced by 40%. The optimum can be achieved with modular quick-change systems. Here the cutting tool is measured outside of the machine in the presetting device. Replacing the adapter therefore only requires a few seconds. You save 90% of your original setup costs! You also reduce your reject rate as the first part is already a good part.

▶ SHORT DESCRIPTION

▶ BENZ SOLIDFIX®

User-friendly, stable and extremely precise

Due to the combination of a zero-play cone-centering unit with an extremely large and flat contact surface in conjunction with high clamping forces, BENZ Solidfix® provides a maximum of tilt resistance and stability, which also meets the requirements for milling. The high torque transfer and the high potential speeds also characterize the performance capability. This is supported by a special clamping mechanism, which operates centrally, without lateral forces, and works together with the high-precision and compact components to achieve top values for concentricity, bending stiffness and repeatability. The structural design makes the system optimally suited for IC tools.

			
+++	++	+++	+++

▶ BENZ CAPTO™

Increase efficiency and processing quality

The BENZ CAPTO™ modular quick-change system guarantees an extremely compact design through the well-conceived integration of the clamping set into the spindle. Special clamping kinematics provide for clamping forces that are significantly above the specifications in ISO/DIS 26623-2. BENZ CAPTO™ can be used for turning on a lathe, milling and drilling with a coolant pressure of up to 100 bar. The system is particularly suited also for heavy-duty cutting.

			
+++	+	+++	+++

▶ BENZ NANOFIX®

Quick change in confined spaces

BENZ Nanofix® is a new quick-change interface that is convincing thanks to its extremely compact design. The outer diameter of 22 mm is designed for minimal spindle distances and is therefore particularly suitable for use in confined spaces.

ANGLE HEADS IN OVERVIEW

DESIGN

MONO WSX

Angle head 90°
Machining: without spatial constraint
Optional: with EC

20

DUO WZX

Angle head 90° - output spindle on both sides
Machining: in opposite direction / with different tools
Optional: with EC

28

FORTE WWX

Angle head 90° - reset output spindle / tool holding fixture
Machining: for spatial constraint / maximum useable tool length
Optional: with EC, IC or EC/IC combination

36

SLIM WGX / SLIM WGX-S

Angle head 90° - narrow or extremely narrow design
Machining: for extreme spatial constraint / maximum useable tool length
Optional: with EC

44

FIX WFX

Angle head 0°-120° - with fixed angle
Machining: special machining at fixed angle
Optional: with EC, IC or EC/IC combination

56

FLEX WDX

Angle head 0°-100° - with flexible angle / stepless adjustment
Machining: in any variable position
Optional: with EC, IC or EC/IC combination

ANGLE HEADS

CUSTOMISED SPECIAL SOLUTIONS

▶ YOUR CUSTOM ANGLE HEAD

We love the challenge and the exceptional!

- ▶ Do you need an angle head that does not match any standard parameters? No problem! We develop and produce your angle head made to measure exactly according to your specifications. Small adaptations to standard products and highly complex new developments are our strength - prompt, affordable and with the usual BENZ quality thanks to our modular kits. Extreme conditions anywhere in the world: our tried and tested components and systems provide you with limitless possibilities.

FROM THE CUSTOMER REQUIREMENT TO THE INDIVIDUAL SOLUTION

- 1 We define the best possible solution and develop an appropriate concept based on your requirements.

- 2 Your contact partner for construction starts implementation after coordinating the solution proposal.

- 3 Your angle head is a high quality piece of work and is produced and assembled at the BENZ factory by experienced employees.

- 4 Your angle head is subjected to various performance tests before it leaves our factory.

► AUTOMOTIVE EXAMPLES

▶ ADDITIONAL SUPPORT

- ▶ **Increased rigidity**
between angle head and machine spindle
- ▶ **Optimum power transmission**
from the machine spindle onto the tool
- ▶ **Improved workpiece quality / service life of the angle head**
due to reduced vibrations

i The need for an additional support depends on the respective machining case. Please contact us. We will be happy to advise you.

additional support

ANGLE HEADS

EQUIPMENT VERSIONS

▶ LOCK AND UNLOCK BLOCK: STOP BLOCK

- ▶ **Positioning the angle head**
at the machine spindle
- ▶ **Fixing the angle head**
against possible turning
- ▶ **Guarantees a high level of repeat accuracy**
during automatic change of the angle head
- ▶ **ISO 9524 standardised design**

i BENZ stop blocks can be adjusted to the machine by the user. In this case, the hole pattern is provided by the user. For this purpose, please observe our latest angle head operating instructions.

We will be happy to help you with the adjustment of the stop block. Please contact us.

- 1 Spacer block**
 - Regulates the distance between stop block and machine
 - Matched to the specific machine
- 2 Stop block**
 - Locks or unlocks the angle head at the machine spindle
 - The slot at the stop block holds the locking bolt of the torque support
- 3 Torque support**
 - Increases the rigidity between angle head and machine spindle
 - As a rule matched to the specific machine
 - Alternative: BENZ standard torque support

Matching

▶ Stop block / torque support

The torque support of the angle head and the stop block at the machining centre must be matched to each other

▶ Stop block / spacer block

The spacer block must be attached to the machine and adjusted by the customer to set the stop block.

► Standard stop blocks

ANGLE HEADS EQUIPMENT VERSIONS

BENZ i.com captures the operating hours of your unit. As additional indicators, speed, temperature and vibrations are recorded and evaluated every 15 seconds. The transparent tool monitoring system recommends service intervals in good time and thus makes it possible to significantly increase the service life of your tool and the reliability of your production. The readout of the operating hours and the operating status is conveniently set via smart device. With the BENZ i.com App you can also contact the BENZ Service directly via e-mail and electronically forward the operating status to it.

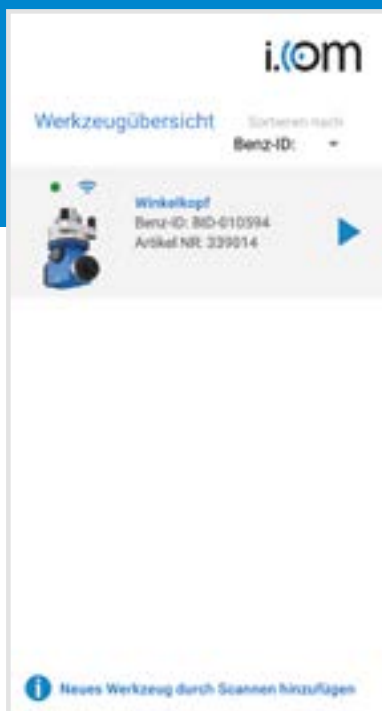

Connections to IIoT platforms are also possible. The app also offers access to the cloud, where you can download all the technical documentation for your tool, such as operating instructions, drawings, protocols, etc.

BENEFITS

- Transparent service intervals
- Prevention of unwanted production downtime
- Increased reliability of your production
- Convenient access to drawings, operating instructions and other documents
- Integrated communication with the BENZ Service Team
- Units are ready to be used for Industry 4.0

The BENZ i.com smartphone and tablet application processes your tool data and thereby gives you important information about your unit's status.

Product view:
Tool data with a preview image.

Tool data:
State display with
operating hours counter

Documentation:
Drawings, manuals, protocols
etc. for download

ANGLE HEADS SERVICE

▶ SERVICES: CUSTOMIZED, VALUE-RETAINING, COST-EFFECTIVE

▶ Service repair

Fast and professional analysis of damage
Findings and repair recommendations within 5 working days
on request: general maintenance or refurbishing

▶ ExpressService

Exceptionally fast and efficient turnaround
Repair at a fixed price
48-hour ExpressService available for select units

▶ Individual crash package

Keep machine downtime and lost profits to a minimum
Highly recommended for customer-specific solutions
Includes regular wear and tear as well as special parts

▶ Preventive maintenance

Prevention: Reduce unplanned downtime, increase unit operating times and unit life cycle
Maintain proper product performance / general maintenance or refurbishing
Replacement of wear parts during your planned downtime

► **Spare part management**

Immediate availability / delivery of original precision spare parts
Comprehensive inventory of spare parts / High availability
Spare parts express shipment as needed

► **Global service**

Service technicians visit you on site

► **Service Hotline**

Skilled service representatives answer your questions and provide additional support in the event of a problem

The screenshot displays the BENZ online product configurator for the 'ANGEL HEAD FORTE WWX'. The interface is organized into several sections:

- Navigation and Product Info:** Includes the BENZ logo, navigation tabs (HOME, PRODUCTS, SERVICE, SUPPORT, ABOUT), and a search bar. The product title 'ANGEL HEAD FORTE WWX' and a brief description are at the top right.
- Design Selection:** A sidebar on the left lists design options such as 'Tooling technology', 'High speed spindles', and 'Spindle cooling'.
- Angle Head Body Selection:** A section titled 'PLEASE CHOOSE THE SIDE OF THE ANGLE HEAD BODY' features a grid of 12 options with columns for 'Body' and 'Max. RPM'.
- Coolant Supply Selection:** A section titled 'PLEASE CHOOSE THE COOLING' offers options like 'No cooling', 'External CDS', and 'Internal CDS'.
- Output Spindle Selection:** A section titled 'PLEASE CHOOSE THE OUTPUT SPINDLE' shows four different spindle options.
- Size of Output Spindle Selection:** A section titled 'PLEASE CHOOSE THE SIZE OF THE OUTPUT SPINDLE' provides a grid for selecting spindle sizes.
- Drive Cone Selection:** A section titled 'PLEASE CHOOSE THE DRIVE CONE' displays six different drive cone options.
- Size of Drive Cone Selection:** A section titled 'PLEASE CHOOSE THE SIZE OF THE DRIVE CONE' offers a grid for selecting drive cone sizes.
- Final Configuration and Quote Request:** A 'Final product' section shows a 3D model of the configured tool and a 'Request quote' button.

USAGE NOTE

GENERAL

The contents of this catalog are not legally binding and are intended solely for informational purposes. Any final agreement will be in the form of a written order confirmation from BENZ GmbH Werkzeugsysteme, which occurs only subject to the respective current General Terms and Conditions of Sale and Delivery of BENZ GmbH Werkzeugsysteme. These can be found online at www.benz-tools.de.

All of the products listed in this catalog are designed for their intended use, e.g. machines for precision machining. The recognized technical regulations for safety and professional work must be followed for use and installation.

Furthermore, the respective laws, guidelines from TÜV, guidelines from the respective trade association and VDE stipulations shall apply.

The technical data listed in this catalog must be observed by the user. The conditions of use may not fall below or exceed the specified data. If information is missing, it cannot be assumed that there are no upper or lower limits or no limitations for specific use cases. Consultation is required in these cases.

Disposal is not included in the price, which would have to be taken into account accordingly in the event of return to or disposal by BENZ GmbH Werkzeugsysteme.

TECHNICAL DATA AND FIGURES

The technical data and figures have been compiled with great care and to the best of our knowledge. We cannot guarantee that the information is up to date, correct or complete.

The specifications and information—such as figures, drawings, descriptions, dimensions, weights, materials, technical and other performance data and the described products and services—contained in general product descriptions, BENZ GmbH Werkzeugsysteme catalogs, brochures and price lists in any form are subject to change and may be modified or updated at any time without prior notification. They are binding only to the extent expressly specified in a contract or order confirmation. Slight deviations from such descriptive product information shall be considered approved and shall not affect fulfillment of agreements insofar as they are reasonable for the customer.

LIABILITY

Products from BENZ GmbH Werkzeugsysteme are subject to the German Product Liability Act. This catalog does not contain any guarantees, assurances of quality or procurement agreements for the products it depicts, neither expressly nor implied, including for the availability of products. Advertising statements relating to quality features, properties or applications for the products are not legally binding.

To the extent permitted by law, BENZ GmbH Werkzeugsysteme is exempt from any liability for direct or indirect damage, subsequent damage and requests of any kind or on any legal basis resulting from the use of information contained in this catalog.

TRADEMARK, COPYRIGHT AND REPRODUCTION

The depiction of commercial property rights in this catalog—such as brands, logos, registered trademarks or patents—does not include the granting of licenses or use rights. Their use is not permitted without the expressed written agreement of BENZ GmbH Werkzeugsysteme. All contents of this catalog are the intellectual property of BENZ GmbH Werkzeugsysteme. For the purposes of copyright, any unlawful use of intellectual property, including excerpts, is prohibited. Reprinting, copying or translating (including in the form of excerpts) are permitted only with the prior written consent of BENZ GmbH Werkzeugsysteme.

STANDARDS

BENZ GmbH Werkzeugsysteme has a quality management system certified in accordance with ISO 9001:2008. BENZ GmbH Werkzeugsysteme has an environmental management system certified in accordance with ISO 14001:2004.

USAGE NOTE

INDIVIDUAL

DECLARATION OF INCORPORATION IN TERMS OF THE EC DIRECTIVE 2006/42/EC ON MACHINERY (ANNEX II 1 B)

We hereby declare that our products meet the basic requirements of the Machinery Directive 2006/42/EC as an incomplete machine to the extent that this is possible as part of delivery.

We also declare that the specific technical documents were produced in accordance with Annex VII Part B of this Directive. We undertake to provide the market supervisory bodies with versions of the incomplete machine's special documents via our documentation department should they have reason to request them.

The incomplete machine also satisfies the stipulations of EC Directive 2014/30/EC on electromagnetic compatibility. The protective goals of EC Directive 2014/35/EC regarding electronic equipment have been met.

The incomplete machine may only be commissioned if it has been ascertained, if applicable, that the machine or system in which the incomplete machine is to be installed satisfies the requirements of Directive 2006/42/EC on Machinery and an EC declaration of conformity has been drawn up in accordance with Annex II.

ARE YOU ALREADY FAMILIAR WITH OUR EXPERTISE? GET TO KNOW US!
